SUMMARY

Computer Science & Business Systems student with hands-on experience building production software used by 2,000+ daily users. Proficient in object-oriented programming (C++, Python, JavaScript) with a strong foundation in data structures and algorithms. Demonstrated ability to ship real-world solutions, collaborate across teams, and rapidly adopt new technologies. Passionate about building reliable, high-quality software that empowers people — eager to contribute to Microsoft's mission.

EDUCATION

B.Tech – Computer Science & Business Systems | St. Vincent Pallotti College of Engineering, Nagpur *Aug 2023 – May 2027*

CGPA: 8.1 / 10.0 · **Relevant coursework:** Data Structures, DBMS, Operating Systems, Web Technologies, Business Analytics

TECHNICAL SKILLS

Languages	C++, Python, JavaScript (ES6+), C — Object-Oriented Programming (OOP)
DSA & CS Fundamentals	Data Structures, Algorithms, Problem Solving, DBMS, Operating Systems
Web / Frameworks	React.js, Node.js, Express.js, React Native, HTML5, CSS3
Databases & Cloud	SQL, Firebase, Google Cloud (Basics)
Data & Analytics	Pandas, NumPy, Power BI, MS Excel, Google Sheets
AI & APIs	Gemini API, AI Agent APIs, OpenAI API basics
Tools & Platforms	Git, GitHub, VS Code, Google Colab, WordPress, WooCommerce

EXPERIENCE

Software Developer – Hostel Monitoring System | St. Vincent Pallotti College of Engineering *Jan 2024 – Present*

- Core developer in a 3-member team applying engineering principles to build a live hostel management platform with 450+ daily active users.
- Gathered and translated user requirements from hostel administration stakeholders into functional software features, ensuring high adoption and satisfaction.
- Designed modules for student activity tracking and record management, improving system reliability and reducing manual coordination effort by automating key workflows.
- Owned full software development lifecycle — design, implementation, testing, debugging, and maintenance — delivering consistent uptime for a daily-use production system.
- Proactively adopted new tools and best practices to improve system performance, observability, and operational consistency at scale.

Freelance Web Developer / Intern | Frolics.co *Jul 2023 – Jun 2024*

- Built and deployed a complete e-commerce platform using WordPress and WooCommerce supporting 2,000+ active users, with a focus on performance, reliability, and user experience quality.
- Integrated Google Analytics to track customer behavior and funnel metrics, applying data-driven insights to guide product improvements.
- Identified and resolved UI/performance bottlenecks, applying industry best practices to optimize page load times and improve customer engagement.

PROJECTS

AI Voice Assistant | Personal Project *2024*

- Engineered an AI-powered voice assistant using object-oriented design principles, integrating Gemini API and AI Agent APIs into a custom interactive UI.
- Solved complex real-time voice detection challenges, applying creative engineering approaches to ensure low-latency and reliable response handling.

Canteen Management System | Academic Project *2024*

- Designed and built a cross-platform mobile ordering system using React Native and Firebase, applying data structure design to optimize real-time order queuing and processing.
- Enabled end-to-end digital transactions and live order status tracking, improving efficiency and eliminating paper-based workflows for 100+ daily users.

AI Resume Builder | Personal Project (Ongoing) *2025*

- Developing an automated resume generation tool using structured input forms and LLM APIs, applying software engineering principles to build a scalable, template-driven architecture.
- Rapidly learning and incorporating new AI API capabilities, demonstrating ability to adopt emerging technologies and apply them to real user problems.

Personal Portfolio Website | Personal Project (Ongoing) *2023*

- Designed and developed a fully responsive, performance-optimized portfolio using HTML5, CSS3, and JavaScript, demonstrating attention to product quality and user experience.

LEADERSHIP & ACTIVITIES

Assistant Director & Founding Member | TNPS Forge Club *2026*

- Co-founded the club and managed hostel-related operational programs, coordinating between student groups and institutional administration.

Discipline Head | IGNITE Forum – CSBS Department *2025*

- Led coordination and discipline management for department-wide academic and technical events attended by 200+ participants.

Event Co-Coordinator | RATAN Business Case Study Competition *2025*

- Managed end-to-end event logistics including planning, participant registration, and on-day coordination.

ACHIEVEMENTS & CERTIFICATIONS

- Coursera Certifications – In Progress: Pursuing certifications in data analysis and software development fundamentals.
